- Team accountability
- Operational efficiency

USER ROLES & ACCESS LEVELS

1. Admin

- Full system access
- Add/edit/delete users
- Access to reports & revenue dashboard
- Modify margins & pricing settings

2. Holiday Consultant

- Access to assigned leads
- Create quotations
- Update lead status
- Upload documents
- Convert to booking

3. Visa Consultant

- Manage visa leads
- Upload visa documents
- Track application stages
- Update status

4. Accounts Team

- Update payment status
- Generate invoices
- Refund processing
- View revenue reports

5. Management

- Dashboard view only
- KPI monitoring
- Conversion reports
- Revenue tracking

CORE MODULES REQUIRED

MODULE 1: LEAD MANAGEMENT

Features Required:

1. Manual lead entry
2. Auto lead capture from:
 - Website forms
 - Meta Ads
 - WhatsApp integration
 - Google Ads

3. Lead source tracking

(Facebook / Instagram / Google Ad / Website / Walk-in / Referral / B2B)

Lead Fields:

- Unique Lead ID
- Client Name
- Nationality
- Contact Number
- Email
- Destination
- Travel Dates
- No. of Adults / Children
- Budget Range (Optional)
- Visa Required (Yes/No)
- Lead Type (Holiday / Visa / Both)
- Lead Source

Lead Status Stages:

- New
- Contacted
- Follow-up 1
- Follow-up 2
- Follow-up 3
- Final Reminder

- Quoted
- Negotiation
- Hot
- Warm
- Cold
- Converted
- Lost (Mandate note required to specify reason)
- Non-Responsive

Automation Required:

- Auto-reminder for follow-ups
- Lead response time tracking (15 min SLA)
- Escalation alert if not contacted within 15 minutes

MODULE 2: QUOTATION MANAGEMENT

Features:

- Ready Package template system
- Custom package builder
- Auto markup calculation
- PDF quotation generator (branded format)
- Price validity field
- Inclusion / Exclusion fields
- Cancellation policy field
- Important Notes field

Response Time Tracking:

- Ready package – 0 - 30 minutes
- Customized package – within 2 hours
- Complex itinerary – within 6 working hours

Note - System should log time between: Lead creation → Quote sent

MODULE 3: BOOKING MANAGEMENT

When lead is converted:

Required Fields:

- Booking reference number (auto generated)
- Supplier name
- DMC details
- Hotel details
- Flight details
- Visa requirement
- Insurance add-on
- Other Services

Payment Rules:

- Minimum 50% advance
- 100% for non-refundable bookings
- Balance before D-2
- No service confirmation without payment proof

System should:

- Block services for allowed number of time period (configurable)
- Alert if supplier deadline approaching
- Track cancellation deadlines

MODULE 4: VISA MANAGEMENT (Separate visa workflow required)

Visa Stages:

- Document Collection
- Application Submitted
- Biometrics Scheduled
- Under Process
- Approved
- Rejected
- Delivered

Required Features:

- Visa checklist per country
- Document upload (passport, Emirates ID, bank statement, etc)
- Appointment date tracking
- Expiry reminder
- Visa fees tracking
- SLA monitoring

MODULE 5: DOCUMENT MANAGEMENT

- Upload passport copies
- Upload visa copies
- Upload tickets
- Upload hotel vouchers
- Generate final itinerary PDF
- Secure storage (role-based access)

MODULE 6: PAYMENT & ACCOUNTS

Features:

- Invoice generation
- Payment status:
 - 1) Pending
 - 2) Partial
 - 3) Paid
- Supplier payment tracking
- Profit calculation
- Refund management
- Service charge tracking

MODULE 7: DASHBOARD & KPI REPORTS

Management dashboard must show:

- Total Leads (Daily / Weekly / Monthly)
- Conversion Rate %
- Revenue Generated
- Profit Generated

- Consultant-wise performance
- Destination-wise revenue
- Visa vs Holiday revenue split
- Lead source performance
- Response time average

MODULE 8: FOLLOW-UP SYSTEM

Minimum:

- 4 follow-ups mandatory
- 1 final reminder mandatory
- Auto-scheduled reminders
- Auto-mark as “Non-Responsive” after Day 4

MODULE 9: SUPPLIER MANAGEMENT

- Supplier database
- Country-wise supplier tagging
- Contract upload
- Rate validity tracking
- Production commitment tracking
- Payment deadline alerts

MODULE 10: MARKETING INTEGRATION

- Lead source analytics
- Campaign performance tracking
- Cost per lead
- ROI reporting
- WhatsApp integration
- Email integration

MODULE 11: WEBSITE INTEGRATION – PACKAGE PUBLISHING

1. Objective: To allow holiday packages created in CRM to be directly published and synchronized with the company website.

2. Core Requirements

- Package Name
- Destination
- Duration (e.g., 3N/4D)
- Starting Price
- Inclusions
- Exclusions
- Itinerary (Day-wise)
- Hotel Details
- Validity Period
- Cancellation Policy
- Package Category:
 - 1) Budget
 - 2) Premium
 - 3) Luxury
 - 4) Honeymoon
 - 5) Family
- Banner Image Upload
- Gallery Images Upload
- SEO Fields:
 - 1) Meta Title
 - 2) Meta Description
 - 3) Keywords
- Package Status:
 - 1) Draft
 - 2) Active
 - 3) Expired
 - 4) Sold Out

Publish to Website Feature

CRM must have:

- “Publish to Website” toggle button
- Auto-sync functionality
- Edit & auto-update website content
- Remove/unpublish option

When:

- Price is changed in CRM → Website auto updates
- Validity expires → Package auto hides
- Marked as Sold Out → Display “Sold Out” on website

Website Display Requirements

- Website should display:
- Package listing page (grid view)
- Destination filter
- Price filter
- Duration filter
- “Enquire Now” button
- “Book Now” button (future payment integration)
- WhatsApp click-to-chat integration

Lead Capture Flow

When customer clicks Enquire Now → Lead must automatically enter CRM with:

- Package Name
- Travel Dates (if selected)
- No. of Travelers
- Contact Details
- Source: Website – Package Page

FUTURE PHASE (OPTIONAL)

- Hotel API integration
- Flight API integration
- Online payment gateway
- Client login portal
- Automated WhatsApp reminders
- Supplier portal access

SUCCESS METRICS

CRM should help achieve:

- 15-minute lead response compliance
- 20–30% conversion ratio
- Real-time revenue visibility
- Reduced manual follow-up errors
- Automated reporting
